DETAILED ACTION

Response to Amendment

Applicant's amendment dated 29 September 2005 has been fully considered. Claims 1-20 are pending. In regards to Applicant's response to the rejections under section 102, the Examiner wishes to state that it was intended that the prior art Haje et al. was to be used in the rejection. However, the Examiner inadvertently provided the wrong reference for the same inventor. The Examiner intended to use Haje et al. (US Patent 6,315,520) rather than Haje et al. (DE 19819508 A 1). The Examiner apologizes for any inconvenience this may have caused Applicant. Applicant's addressing of the rejection under 112, 2nd paragraph of claim 12 has been noted with appreciation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5, 6 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Haje et al. (US 6,315,520). Haje et al. disclose a steam turbine comprising: a rotor 2 having a plurality of rotor blades 4; a plurality of guide vanes 6 spaced from the blades 4; and a casing shell 10 formed of a plurality of casing segments wherein at least one of the segments is

provided with at least one integrated cooling channel forming a cooling system 28. The cooling system uses steam as a cooling medium (Column 7, lines 18-34).

The applied reference has a common assignee and inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claims 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by

Oeynhausen et al. (6,102,654). Oeynhausen et al. disclose a method for operating a steam

turbine having a casing sell 15 comprising: providing at least one cooling channel integrated into
the casing shell; at least partially admitting coolant 5, in this case steam (column 2, lines 38-40),
via the cooling channel to the casing shell delimiting the space for a flow medium 4; and
admixing the coolant to the flow medium.

CONCLSUION

Allowable Subject Matter

Claim 3 is allowed.

Claims 2, 4, 7-10 and 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3745

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwayne J. White whose telephone number is (571) 272-4825. The examiner can normally be reached on 7:00 am to 4 pm T-F and alternate Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look can be reached on (571) 272-4820. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
